- Multimodal LLMs for code generation

Johns Hopkins University Baltimore, Maryland
Research Assistant, Vision and Image Understanding Lab advised by Dr. Vishal M. Patel *2023 - Present*

- Leading research efforts for the IARPA BRIAR grant, focusing on face recognition in extreme scenarios.
- Worked on designing a multi-task model for multiple face analysis tasks.
- Evaluated Multimodal LLMs on face understanding, and explored future directions such as SFT and tools use.
- Currently exploring video diffusion models and autoregressive models for face-related generation projects.

Indian Institute of Technology Jodhpur Jodhpur, India
Student Researcher, IAB Lab advised by Prof.Richa Singh and Prof.Mayank Vatsa *2022 - 2023*

- Worked on deepfake video generation, with a special emphasize on multi-face, low-resolution, and occluded videos.
- Introduced the concept of phylogeny (evolution) in deepfake video generation by sequentially swapping multiple faces.
- Developed the DeSI algorithm, capable of detecting deepfake videos on the Twitter platform and predicting their spread.
